Beni Naem, Hebron | Apartheid

The lives of the Palestinians in Bani Naeim have become an ongoing nightmare since the establishment of a new terror outpost near Ma'ale Hever.

Back in Oct, settlers settled, deliberately, only 50 meters from the houses. This is what happened ->>

In this photo you can see how close it is.

The tents in the front are the homes of the village. The caravan on the hill in the back is one of the buildings of the terror outpost ->

On Oct 21st, one of the first things the settlers did after establishing the new outpost is to set ablaze the hay used to feed the sheep. They know the biggest expense for shepherd communities is animal feed, and if they inflict this financial blow, herding would become uncostly & the Palestinians would sell their flocks and leave.

Afterwards, armed settlers with M16 rifles denied the villagers to graze on their own lands.

A few times a week sometimes every day ->

Over time, they escalated, with armed settlers frequently invading between and even inside homes of the village, terrorizing locals and children. Anyone who tries to stop them is labeled a terrorist and risks being shot

You are also an anti-semite if you say that you oppose this

When I say 'often armed invasions,' I am giving a moderate definition of it. Here, locals asked an armed settler:, 'Where are you going? Go back! You're entering our homes!'"

It's a deliberate systematic terror plan to force the Palestinians out of the village ->

A daily nightmare.

Just to give you an example here is an attack and harassment by settlers that took place already yesterday!

They entered the village's homes

One of the arch-settlers who leads such terrorist attacks is a settler named Matan.

In the video, the man is telling the settler you are closing the road for the village ->

The settlers (also mini-ones) also have a habit of blocking the road. To decide who passes through & who doesn't, to demand searching the car or seeing an ID. They like to play as if they're army to pass the time, as if the lives of the people in Bani Naim are some kind of a game.

Here is an interview my friend did with one of the residents Ibrahim.

For the question: are these settlers or soldiers? Ibrahim answers very clearly: no difference. A settlers would change his uniform and then go down to the village beating them or destroy properties
